

Working from Home Risk Assessment Form

RA Ref No:

Employer's Assessor	Job Title	Assessment Date	Review Dates / Initials

Assessment location: _____

Persons at risk	Frequency	Details	Are any disabled?	Comments
Homeworker			<input type="checkbox"/> Yes <input type="checkbox"/> No	
Family			<input type="checkbox"/> Yes <input type="checkbox"/> No	
Visitors			<input type="checkbox"/> Yes <input type="checkbox"/> No	

Hz No.	Hazard description	How are persons affected?	Initial Level of Risk			Existing controls	Further controls / action	Residual Level of Risk		
			P	S	R			P	S	R
1	Slips, Trips and Falls – trailing cables from computers and associated equipment	Anyone who uses the area of the home which is used for work may trip on any cables or leads which run across floors	4	3	12	Ensure as far as possible that cables and leads are not across walkways. Use cable tidy's where leads must cross walkways	<<E.g. Use blue-tooth or wireless devices where possible>>	4	2	8
2	Inadequate desk/work space Inadequate lighting	Home desks are often placed in a corner of a room and compete with other furniture for floor space. Filing cabinets and shelves, computer equipment – monitors/ printers/ scanners/ phones and faxes etc all take up space which could mean the user has insufficient space to have his/her desk/workstation properly set up to avoid musculo-skeletal issues. Household lighting may	3	4	12	Ensure there is adequate heating and ventilation. Make sure the desk area is large enough to be able to write/read/type etc. Make sure the chair is suitable – adjustable height, casters. Consider carpet protector mat for ease of manoeuvring chair. Ensure suitable desk/floor lighting is provided	<<E.g. Create separate designated workspace such as change use of redundant bedroom or garage>>	3	2	6

<i>Probability (P)</i>	<i>5=very likely, 4=likely, 3=quite possible, 2=possible, 1=unlikely</i>
<i>Severity (S)</i>	<i>5=fatal, 4=severe, 3=moderate, 2=slight, 1=negligible</i>
<i>Risk (R)</i>	<i>0-8=low risk, no action required. 9-15=medium risk, ensure adequate controls are in use. 16-25=high risk, stop operation & implement control measures</i>

		not be in the most appropriate place for the computer user							
3	Fire – overloaded electrical sockets	Computers and their accessories require many more power points than are normally installed in a domestic property. Overloading sockets with high current drawing equipment can cause fires	5	4	20	Carry out Periodic Inspection of electrical system to ensure wiring meets current standards. Ensure a smoke alarm is fitted and an extinguishers is kept in an accessible location	<<E.g. Avoid plugging multi socket extension leads into other multi socket leads>>		
4	Manual handling of files/folders, boxes/parcels. Falling objects	Homes are not often fitted out with shelves or racking to accommodate storage of business materials. This may result in having to carry materials up/down stairs for storage, which will increase the risk of musculo-skeletal injuries. Poor stacking may result in items falling or causing injury through awkward lifting or twisting	3	4	12	Keep storage areas as close to work area as possible to minimise the distance materials need to be carried. Use trolleys etc where practicable. Install suitable shelving/racking			
5									

Probability (P)	5=very likely, 4=likely, 3=quite possible, 2=possible, 1=unlikely
Severity (S)	5=fatal, 4=severe, 3=moderate, 2=slight, 1=negligible
Risk (R)	0-8=low risk, no action required. 9-15=medium risk, ensure adequate controls are in use. 16-25=high risk, stop operation & implement control measures
